REPORT U. S. TROOPS IN MEXICO

MUNICIPALIST SHOT BY ADMIRAL IS DEAD

OLIMSTEAD HELD AS SLAYER

Charge Against Woolen Salesman Is Changed to Murder and He Is Held for Trial Without Bail

Mrs. Violet Moores, a Winter street mannequin, who was shot four times by Irving Ellis Olimstead, salesman for the William Whitman Company, died today at the Relief Hospital.

The charge against Olimstead of assault with intent to kill was changed to murder, and he was held without bail. He was arraigned in the Municipal Court this morning and held in \$10,000 pending the outcome of the woman's wounds.

As soon as the police learned of Mrs. Moores' death the charge was changed, bail withdrawn and Olimstead held for the grand jury.

When arrested, Olimstead, who is married, told the police he shot Mrs. Moores because she "double-crossed" him.

The mannequin shop on Winter street where the shooting took place was open for business today as usual. Customers observed a bullet hole in one of the walls, and Miss Snow, a partner in the business, was kept busy answering telephone inquiries regarding Mrs. Moores' condition.

EMPLOYEES ENVAILED.
Employees of Irving Olimstead and his closest business associates were unaware of the double life which he was leading, according to one of the Whitman men. He said to the AMERICAN today:

"Olimstead came to us about a year and a half ago from a Summer street wool concern. He was a high-spirited man, of vainglorious habits and good ability, and we thought a great deal of him."
"I talked with him as late as 3 o'clock yesterday afternoon. He was normal and had not been drinking. He seemed disappointed over the fact that he could not get a Philadelphia trip last Sunday night and would have been there yesterday had I not been concerned. He traveled between Boston and Philadelphia and was at home nearly every week-end, as far as we knew."

Officials of the Summer street firm who employed Olimstead from eight to ten years prior to his joining the Whitman firm spoke highly of him. The police learned today that Olimstead first became acquainted with

BRANDIS ASSAILED BY TAFT

Moorefield Storey and Root Are Among Those Signing Petition to Sub-Committee of Senate

By International News Service.
Washington, March 14.—Former President Taft, Elihu Root, Simon Baldwin and others equally prominent today registered protests against the confirmation of Louis D. Brandeis as an associate justice of the United States Supreme Court.

A petition bearing their signatures saying Mr. Brandeis "is not a fit person" for the office was presented today to the Senate sub-committee which is investigating his fitness.

The undersigned feel under the painful duty to say to you that in their opinion, taking into view the reputation, character and professional career of Louis D. Brandeis, he is not a fit person to be a member of the Supreme Court of the United States," the petition reads.

WORKY ON PETITION.
Other signers of the petition were Joseph H. Choate, Francis Rawlin, Moorefield Storey and Peter McElrath, Savannah attorney.

The petition was presented by Austin G. Fox, counsel for the organized opposition to Brandeis.

William F. Fitzgerald of Towle & Fitzgerald, Boston stock brokers, told of Brandeis' connection with the Old Dominion Copper Company case. Fitzgerald retained Brandeis to represent him in a fight for control of the company. After he had gained control the Phelps-Dodge Company came in and cooperated in the rehabilitation of the Old Dominion Company, according to Fitzgerald. It was proposed to consolidate the Old Dominion and the United Globe, a Phelps-Dodge property.

An engineer was employed by the directors of the Old Dominion Company to investigate the relative value of the properties of the two companies. Fitzgerald was unfavorably concerned the United Globe property as compared with the Old Dominion property.

This report was adverse to the interests of Phelps-Dodge, which company represented the large financial interests in this matter.

AMERICANS ARE LEAVING CHIHUAHUA

Washington, March 14.—American Consul Letcher, at Chihuahua City, Mexico, called the State Department today that thirty-five Americans were leaving there on a special train for the Texas border. The cable was dated yesterday. Thirty-seven Americans remain in the city and surround the district, he said.

FIRST PHOTOGRAPH FROM COLUMBUS, N. M., taken during the recent raid by Villa and his bandits. This shows Colonel Pablo Lopez, who was second in command of the invaders, just after he was shot dead in the suburbs of Columbus by members of the pursuing Thirteenth United States Cavalry. Lopez was in personal command of the outlaws who killed eighteen Americans near San Ysabel, Chihuahua.

WARN AMERICANS TO LEAVE MEXICO

Vera Cruz, via Galveston, March 14.—United States Consul William W. Canada has advised all Americans to leave the interior of Mexico without delay. The exodus already has begun. The Governor of Vera Cruz has received information of the preparations at the border for the American expedition against Villa and is displeased at the imminence of an invasion.

TODAY'S BANK CLEARINGS.

Boston sub-treasury credit, \$155,034.
Boston clearings, \$39,400,035.
New York sub-treasury credit, \$127,274.
New York clearings, \$540,917,515.
The New York sub-treasury gained \$2,442,000 from banks yesterday, a total gain of \$3,253,000 since Friday last.

Latest War Bulletins

London, March 14.—The army estimate bill, providing for a British army of 4,000,000 men, was introduced in the House of Commons today by Under Secretary of State for War H. J. Tennant. The estimated cost of the munitions for the proposed army (including that necessary for the navy) is placed at \$15,000,000 daily by the War Office.

Constantinople, March 14.—A British aeroplane has been shot down in the Felahie sector in Mesopotamia and the occupants were killed, it was officially announced by the Turkish War Office today.

London, March 14.—All German officers below the rank of captain have been ordered to leave Bulgaria for Germany at once, according to the Rome wireless press.

KAISER'S THROAT TROUBLE RENEWED

Paris, March 14.—Unconfirmed dispatches from Rome today said that the Kaiser's throat is again giving him trouble.

RACE TRACK AT JUAREZ IS CLOSED

El Paso, Texas, March 14.—Following a conference today, Commander General Gabriel Gaviira, commander of the Juarez garrison, and Colonel Matt J. Winn, manager of the Juarez track, it was decided to terminate the present meeting immediately. General Gaviira stated that in view of the threatening aspect of affairs he would no longer be able to guarantee protection to Americans.

DENY NEW TRIAL IN GAMING CASE

Julius Sanderson in the Superior Court today overruled a motion for a new trial made by the Hammond Hotel, owners of the Hotel Essex, against whom a verdict of \$610,000 was rendered in favor of Robert H. Koenig, a Brooklyn showman. Koenig claimed that he lost \$5,000 in a fake poolroom in rooms 280 and 282 on the ninth floor of the Essex.

REPORT BANDIT IS TRAPPED IN HILLS

REPORT BANDIT IS TRAPPED IN HILLS

By WALLACE F. SMITH, International News Service Staff Correspondent.

El Paso, Tex., March 14.—It is reported from San Antonio that 1,500 American soldiers have crossed into Mexico "somewhere on the border," and that fighting with Mexican outlaws is hourly expected. It is reported that troops will begin crossing into Mexico from Columbus, N. M., tomorrow.

Brigadier-General John J. Pershing has left El Paso and taken command at a point on the border of the troops which he will lead in pursuit of Francisco Villa and his bandit raiders.

All the long border of the continued is waiting for the league call that will signify the opening of the campaign to bring Villa to long-deferred justice. From all parts of the country troops continue to mass toward the international boundary line for the drive that promises to make history in swift, thrilling chapters.

VILLA TRAPPED, SAYS GAVIRA

General Gabriel Gaviira, military commander in Juarez and commander of the Carrizosa force on the border, declared today that Villa had been trapped in the hillside mountain retreat in the Guerrero district. He asserted that the Carrizosa troops had the elusive "Pancho" hemmed in on every side.

It was reported from another source that Villa might change his plan of mounting and make a stand against the United States troops at Chihuahua. A narrow gap in the Sierra Madre Mountains, in the western part of the state of Chihuahua, was named the "Pancho" trap. The Carrizosa troops are now on their way from Columbus.

Arrest Two East Boston Strikers; Grant Demands

Two arrests were made and a suit was only averted by the arrival of a squad of police at the East Boston today when 100 strikers from the Eagle-Cook House company met there while their representatives called upon officials of the company.

Two strikers, William P. Reilly of No. 236 Maverick street, East Boston, and Anthony Calvey of No. 128 Bedford street, East Boston, became involved in an argument in the lobby and outside the door.

A patrolman seized them, but their friends were joining in when a squad of police arrived on the jump from Station T across the street.

When the men had been taken to the station and locked on charges of assault and battery, quiet settled over the remaining strikers. The Boston Agent William H. Watson returned and announced that the company had agreed to the raise of wages demanded and that everyone should go back to work tomorrow morning.

Virginia Due Tomorrow

The battleship Virginia is due here from Quantico tomorrow to undergo extensive repairs.

DENY EMBARGO ON ARMS TO MEXICO

Washington, March 14.—The customs division of the Treasury Department today issued a denial to reports that the government has placed an embargo on arms to Mexico. Arms and ammunition are barred only from Villa territory, it was stated.

CRIES 'GOOD-BYE' TO MATE AND DROWNS AS DORY CAPSIZES

The fishing schooner *Frances S. Gresham* came in the Fish wharf, South Boston, today with its flag at half-mast for the loss of Joseph Phillips, one of the crew, who was drowned off Chatham last Friday about while in arms reach of his partner, James Fractor, who was unable to give aid.

Phillips and Fractor were rowing back to the schooner after setting trawls. A heavy sea caused the dory, which floated bottom up, Fractor caught the dory's painter. Phillips was thrown beyond reach of the dory, but managed to get hold of a trawl-haul.

Water struck into such man like in ten minutes. Phillips, though the larger of the two, weakened rapidly. In a moment or two he called to Fractor: "Jim, Jim, I'm all in."

Fractor, barely able to keep his hold on the dory's painter, gasped back: "I can't help you, Jim."

"Goodbye Jim," and Phillips feebly, he went under, and he is drowned.

Olmstead, Held Without Bail After Shooting Manicurist, Visited by Wife

Photo-diagram showing Mrs. Violet Olmstead was shot in her apartment shop by Irving L. Olmstead. The figures illustrate how the attack was made as woman attempted to reach telephone.

Continued from First Page.

Mrs. Moore under the name of Harry Clifford. It is said she learned he was married a year ago and since that time had tried ineffectually to persuade him to leave her.

On one occasion they are reported to have engaged in a violent quarrel in the manure room, and Mrs. Moore ran into the street without hat or coat. Only last week they took dinner together, the police say, and Olmstead spoke of the woman's son, William, a student at the Somerville English High School, who died last summer. The two were stricken with premature paleening at the V. M. A. camp at Friendship Station. When Olmstead referred to her son, Mrs. Moore left the table.

TELL OF SHOOTING.

On Saturday the police say Olmstead went to the manure shop and the couple became involved in an argument. It is understood that Olmstead learned he had a successful rival, and that he tried to learn his name, but without success. He left and returned Monday afternoon, remarking: "Well, after Saturday I suppose I am all through. But we still can remain good friends. Let's all go to the movies and see a picture."

Miss Edith Hubbs, who with Mrs. Moore and Mrs. Moore's partner in the business, was in the shop at the time the incident was related.

VISITED BY WIFE.

Olmstead, who had walked the floor of his cell at night, was visited by his wife and her brother at the police station early today. The police say that the shooting was calm and business-like in character. After a short conference Mrs. Olmstead and her brother left the police station and went to the Parker House.

The police who took no breakage with the exception of a cup of coffee, told the police that the gun with which the shooting was done was purchased by him as protection against crooked gamblers in Fleet Street, who he claimed had robbed him of \$200.

According to persons in the White-Mine office, Olmstead was so far ahead in his orders that he had to do practically no work.

Olmstead was arrested by the police of the Court square station, who were hurriedly summoned by telephone and arrived at the manure shop to find Olmstead, with his arms around Mrs. Moore, supporting her in a sitting position on the floor.

"DOUBLE-CROSSED HIM."

He declared that he had shot Mrs. Moore "because she had double-crossed him." He further explained and a description of shooting, the police were obliged to get from Mrs. Edith Hubbs, of Fleetway street, Mrs. Moore's partner in the manure business.

Miss Hubbs was a helpless witness of the shooting. Trained with her, she watched Olmstead fire five shots in succession before she could force herself to rush into the next office and telephone for the police.

It was late in the afternoon that Olmstead, who seemed to Miss Hubbs to have been drinking, came into the room on the third floor, No. 42 Winter street, where Miss Hubbs and Mrs. Moore conduct their manure shop. Mrs. Moore was serving a woman customer.

Miss Hubbs saw Olmstead take off his coat and hat, throw them on a chair and stand waiting for Mrs. Moore to finish manuring her customer. Waiting Mrs. Moore, Olmstead drew from his pocket what seemed to be a brand new automatic revolver, and stood whirling it around his head.

Mrs. Moore caught sight of the revolver and spoke to Olmstead, who should be arrested for handling a revolver. But she was told to "be quiet."

Olmstead obeyed, but did not answer. Mrs. Hubbs, seeing that Mrs. Moore was nearly through with the

The Wife and the Other Woman in Latest Triangle

Irving Olmstead to Mrs. Violet C. Moore: "Are you going to throw me down after three years?"

Mrs. Moore: "Yes, I am. I am, if I want to. Why not? Haven't I given you three years of my life?" Then Olmstead shot her.

Mrs. Olmstead, when the news was broken to her, "I think you have made a mistake. My husband never had any women friends that I did not know of. Why, it's preposterous. He was devoted to me and the children. He is a home-loving man. He is always at home evenings, except when he is traveling. For goodness sake don't let the mistake get into the paper."

customer, and that Olmstead had replaced the revolver in his pocket, but ran to another office in the building.

When she returned she saw the customer, Miss Gurnsey, leaving the room. Mrs. Moore was still in her place at the manure table, and Olmstead was standing in front of the table, facing her.

Before Miss Hubbs could tell what they were saying, the telephone bell rang. Mrs. Moore got up and answered it.

"Tell him you can't meet him tonight," he called to her. "You are going to meet him."

"No, I'm not going to meet him," Mrs. Moore replied.

When she was through at the telephone Olmstead declared: "Are you going to throw me down after three years?"

JUST AS HAPPY AS IF
THEY HAD BRAINS

Moran to Take It Easy Glad Experts Pick Him

By FRANK MORAN.

Challenge for the World's Heavyweight Title.
NEW YORK, March 14.—A thing that gratifies me very much is the way popular opinion as to my chances of beating Jess Willard is swinging my way.

When a fellow has a crowd believing in him, as he honestly believes in himself, it counts a lot, and I know that it will with me. A signed statement by Jack McAuliffe published in the AMERICAN yesterday was particularly gratifying.

Jack was one of the greatest light-heavyweights in the history of the game, and is the only champion who ever retired undefeated.

APPRECIATE McALLIFFE'S TIP.
I told him a few days ago how I intended to fight Willard. I told him the plan of battle Willie Lewis and myself had mapped out, and that "such a great general as Jack sets his approval on it convinces me more than ever that I am going to be returned the new champion."

In his story, Jack picked me to win by a knockout. I hope that he is right. This contest with Willard offers me the opportunity I have worked for ever since I broke into the game, and you can rest assured that I am going to make the most of it.

I have trained as best I know how. I have put myself in Willie Lewis' hands, and as Jack McAuliffe says, Willie is the greatest trainer of boxers in the world. I have confidence in his judgment.

What Willie says goes with me, only today he said he wanted me to modify my schedule of training.

PLANS SEVEN WEEKS' WORK.
I shall not box every day this week, instead, I am going to put on the gloves tomorrow, Friday and Saturday. Next Tuesday will mark the end of the training bouts for me. I will use put on the gloves from that day until the time I step into the ring.

I shall, however, adhere to my old side schedule, and include in some high gymnastics, which will keep my physical condition right. I shall set out for a run at least once a day and spend as much of my time outdoors as possible.

I was out on the road yesterday with Lewis and later went through a session in the gym. When I was through, I hopped on the scales and tipped the beam at 204 pounds. I am a week and a half going to motor out to Cranford, N. J. today, and spend the day telling around.

Strangler Lewis Makes Bow Here on March 22

"Strangler" Ed Lewis, who has to his credit a two-hour battle with Joe Stecher, is one of the stars who will appear at George Tucker's next wrestling carnival in Mechanics Building on Wednesday evening, March 22, when four finish matches will be decided. It will be the first appearance in Boston of Lewis, who was the winner of the catch-as-catch-can division in the New York tournament.

Another newcomer will be the Great Darro, the world-famous strong man and wrestler, whose vaudeville acts includes juggling with pianos, automobiles and other tricks. Darro will be paired with American, who has been seen here since his great battles with Burns and with Champion "Punk" Jotch. American and Darro will go to a bush, best two out of three falls.

Waldie Zhyzko, the clever Polak, is also on the card and will be given the task of training Ruyvina, the big Polisher, while Karl Lemie will round out the program against some first-class men.

All four matches will be under catch-as-catch-can rules.

BREWER DOES NOT
CLOSE HIS OPTION

Worcester, March 14.—Patrick H. Worcester, Edwin P. Smith and John J. McMahon of Worcester and "Bill" Hamilton of Clinton are the new owners of the Worcester (Hampden League) club. Hiram T. Brewer of New York called to close his option with Paul Hale yesterday. Hamilton, Boston's former baseball idol, is to serve as manager of the club.

LIPTON HEARD FROM
London, March 14.—Sir Thomas Lipton in a letter to the Essex Yacht Club says he hopes to compete next year for the America's cup.

Hon. Heinie Zim
Gets Divorce
in New York

By International News Service.
New York, March 14.—Heinie Zimmerman, premier pill-popper of the Chicago Cubs, was granted a decree of divorce from Mrs. Helen Charas Zimmerman by Supreme Court Justice Tierney in the Bronx. The divorced did not contest the action.

Testimony showed the couple was married in 1912 and have one child, three and one-half years old, the custody of which will be determined later.

Zimmerman named Richard Haskins as co-defendant. He alleged that his wife had met Haskins June 12, 1912 at a hotel at Lenox avenue and One Hundred and Twenty-fifth street.

JERRY MOORE puts on another sensational show at the Massachusetts Auto Association, No. 182 Highland street, tomorrow night. There will be bouts in the 115 and 125-pound classes and a special between the Community of Charleston and Leo Krew of Roxbury, two mighty tiddlyweightweights.

BRICKLEY RESIGNS
AT JOHNS HOPKINS

Baltimore, March 14.—Charles E. Brickley, Harvard's 1914 football captain and famous drop-kick, has asked to be permitted to resign as Johns Hopkins coach for next fall. It is understood he is going to take over active head at Harvard, though also coached by Penn State.

PARI-MUTUEL FIND
FAVOR IN MARYLAND

Annapolis, Md., March 14.—Three more racing bills have introduced in the Senate, making five in all brought in this session. Two of them provide only for pari-mutuel pools, and this feature will undoubtedly be made a part of whatever bill is passed as that bookmaking will be a thing of the past.

HOCKEY PLAYOFF TERMS.
New York, March 14.—Officials of the Amateur Hockey League will meet today and decide the conditions of the playoff for the championship between the U. S. A. and the U. S. C. The local event wants one game, while the U. S. A. favors a three-game series.

HEALTH HINTS
Inflammation.

Mind's inflammation promptly reduces inflammation and promotes rapid, healthy healing, because this aid prescription is a safe, trustworthy medicine that gives relief, giving almost instant relief. It is absolutely pure, is easy to use and does not stain or blister. It is the one dependable liniment in almost every New England home—Advert.

THE SMOKE OF MEN WHO WIN

A fresh-rolled "Bull" Durham cigarette almost says "Speed up!" right out loud. Keen-eyed, clear-headed young fellows smoke "Bull" Durham because it has the sparkle and the "punch" — the youthful vim and vigor. Every time you "roll your own" with "Bull" Durham you open the door to Hustle.

GENUINE
"BULL" DURHAM
SMOKING TOBACCO

"Bull" Durham is unique among the world's tobaccos. It is distinguished from all others by its wonderful mildness, its delicious mellow-sweet flavor and its distinctive aroma.

That's because it's made of the very choicest of rich, ripe Virginia-North Carolina "bright" leaf—the smoothest and mellowest tobacco in the world.

You get a lively smoke and a satisfying smoke when you "roll your own" with "Bull" Durham.

FREE
An illustrated booklet, showing correct way to "Roll Your Own" cigarettes, and a package of cigarette papers, will both be mailed free, to any address in U. S. on request. Address "Bull" Durham, Durham, N. C.

ATHLETIC NEWS AND CHATTER

DAVE POWERS has two badly colored spots to show for his recent bout with Terry Brooks. The black student must have won with a lot to spare, judging by the appearance of Dave's mangled-up countenance.

JOHN OROCKE wants to send Tommy Brown of Newark, N. J., against the winner of the Mike Chicago Club, was granted a decree of divorce from Mrs. Helen Charas Zimmerman by Supreme Court Justice Tierney in the Bronx. The divorced did not contest the action.

Testimony showed the couple was married in 1912 and have one child, three and one-half years old, the custody of which will be determined later.

Zimmerman named Richard Haskins as co-defendant. He alleged that his wife had met Haskins June 12, 1912 at a hotel at Lenox avenue and One Hundred and Twenty-fifth street.

JERRY MOORE puts on another sensational show at the Massachusetts Auto Association, No. 182 Highland street, tomorrow night. There will be bouts in the 115 and 125-pound classes and a special between the Community of Charleston and Leo Krew of Roxbury, two mighty tiddlyweightweights.

BRICKLEY RESIGNS
AT JOHNS HOPKINS

Baltimore, March 14.—Charles E. Brickley, Harvard's 1914 football captain and famous drop-kick, has asked to be permitted to resign as Johns Hopkins coach for next fall. It is understood he is going to take over active head at Harvard, though also coached by Penn State.

PARI-MUTUEL FIND
FAVOR IN MARYLAND

Annapolis, Md., March 14.—Three more racing bills have introduced in the Senate, making five in all brought in this session. Two of them provide only for pari-mutuel pools, and this feature will undoubtedly be made a part of whatever bill is passed as that bookmaking will be a thing of the past.

HOCKEY PLAYOFF TERMS.
New York, March 14.—Officials of the Amateur Hockey League will meet today and decide the conditions of the playoff for the championship between the U. S. A. and the U. S. C. The local event wants one game, while the U. S. A. favors a three-game series.

HEALTH HINTS
Inflammation.

Mind's inflammation promptly reduces inflammation and promotes rapid, healthy healing, because this aid prescription is a safe, trustworthy medicine that gives relief, giving almost instant relief. It is absolutely pure, is easy to use and does not stain or blister. It is the one dependable liniment in almost every New England home—Advert.

THE SMOKE OF MEN WHO WIN

A fresh-rolled "Bull" Durham cigarette almost says "Speed up!" right out loud. Keen-eyed, clear-headed young fellows smoke "Bull" Durham because it has the sparkle and the "punch" — the youthful vim and vigor. Every time you "roll your own" with "Bull" Durham you open the door to Hustle.

GENUINE
"BULL" DURHAM
SMOKING TOBACCO

"Bull" Durham is unique among the world's tobaccos. It is distinguished from all others by its wonderful mildness, its delicious mellow-sweet flavor and its distinctive aroma.

That's because it's made of the very choicest of rich, ripe Virginia-North Carolina "bright" leaf—the smoothest and mellowest tobacco in the world.

You get a lively smoke and a satisfying smoke when you "roll your own" with "Bull" Durham.

FREE
An illustrated booklet, showing correct way to "Roll Your Own" cigarettes, and a package of cigarette papers, will both be mailed free, to any address in U. S. on request. Address "Bull" Durham, Durham, N. C.

The Worst Kind of Flirtation

Dorothy Dix Tells Girls Why It Is Both Foolish and Futile to Accept Attention from Married Men

By DOROTHY DIX

THE worst kind of flirtation in the world, the one which makes the biggest mistake and the one which does the most wrong to women, and which is the most foolish and the most futile, is the flirtation which is a mere game, a mere amusement, a mere way of passing time, and which is not a serious thing, and which is not a thing which is worth while, and which is not a thing which is worth the trouble of doing. It is the flirtation which is a mere game, a mere amusement, a mere way of passing time, and which is not a serious thing, and which is not a thing which is worth the trouble of doing.

A GIRL'S WORST ENEMY
A girl's worst enemy could find no better way to destroy her than to induce her to fall in love with a married man. Yet I know many girls who boast that they have an "special fascination" for married men, and who seem to find a particular pleasure in flirting with them. These girls think it great fun to carry on their flirtations with married men right under their wives' noses, and who, with a laugh, tell you how some girl, friend, or acquaintance, who was once green with jealousy at their flirtation with a married man, has since then been a devoted wife and mother.

Advice to the Lovelorn

By BEATRICE FAIRFAX

NOT PROPER

DEAR MISS FAIRFAX: I am engaged and have had the attention of a young man of twenty and a man of thirty. Last Christmas I received a card from the elder of the two younger ones. I accepted the box of candy, but returned the bracelet. The young man felt insulted by my returning the bracelet.

UNDECIDED

I do not consider it proper for a young woman to accept gifts of jewelry from a man friend, either before or after marriage. I am not at all in favor of any form of abrupt relations which are calculated to hurt the feelings of either party.

SHE HAD BEEN IN VERY BAD HEALTH

Boston Lady Relates How Plant Juice Has Restored Her to Perfect Health.

Twenty-five per cent. of our human population is afflicted with some form of chronic disease. The most common of these diseases is that of the stomach and bowels. It is a disease which is often overlooked, and which is often the cause of many other diseases. It is a disease which is often the cause of many other diseases. It is a disease which is often the cause of many other diseases.

STOP GRAY HAIRS

Quickly and Safely

No one can tell you that you need anything but Mary T. Giddens' Gray Hair Restorer. It is a simple, safe, and effective remedy for gray hair. It is a simple, safe, and effective remedy for gray hair. It is a simple, safe, and effective remedy for gray hair.

Spring Woos Winter

(And Winter Still Is Cold)

By NELL BRINKLEY

It is Spring calling, we reckon. The birds hie and stretch wings on the sunny porch-room—all the huddling poses vanished, quizz. The starling—English that he is—takes his bath in his water and whistles like a gamine thereafter because it is warm in the sun and his wet wings will not freeze with ice. Something is up.

Just Spring wooing Winter? Somewhere he is murmuring his love-words, bidding her melt her frozen heart and come with him. Today she is listening a bit with thaw at her heart. But tomorrow—who can tell! She will be cold tomorrow—trapped in ice and snow; glacial, gleaming coldly and not hearing at all—fascinated with the glitter and fire of the snow crystals in her crepe.

And Summer, stirring for just a space, will have lapsed again into some slumber.

Spring woos Winter—but she still is cold.

NELL BRINKLEY

Ill-Temper and How It May Be Cured

By BEATRICE FAIRFAX

I have been suggested by more than one writer of eminence that ill-temper should be considered a just cause for divorce. Some, of course, are absolutely shocked at the idea, but the suggestion is based on good common sense. It was Henry Drummond who said: "No form of vice, nor worldliness, nor greed or gold, nor drunkenness itself, does more to unchristianize society than evil temper."

Before such strong measures as divorce are thought of, would it not be better to see to it what way this evil temper might be cured?

One woman of the writer's acquaintance was a perfect model in her own violent passion. Directly anyone annoyed her she flew out at him, and she was so quick and so sure that the after-effects proved most painful.

"I'm quite sorry for Mr. J.," she said, "but she jumps on him for the least thing."

These words were overheard by the lady in question, and she was so quick and so sure that the after-effects proved most painful.

"I'm quite sorry for Mr. J.," she said, "but she jumps on him for the least thing."

These words were overheard by the lady in question, and she was so quick and so sure that the after-effects proved most painful.

Are We Enveloped in Auras?

Some Strange, Unproved Statements Made on This Subject in Name of Science

By GARRETT P. SERVIS

A NUMBER of pictures of the heads of men and women have been shown to a request that I explain what they mean. Some of the pictures represent smiling faces proceeding in all directions from the head, suggestive of nimble lightning. Others take the form of irregular clouds, composed of intermingled, sharp-pointed waves of different amplitude. Still others show the head enveloped in concentric undulating lines, spaced gradually wider apart until they cease.

According to a description accompanying these pictures the first form of "aura," resembling tiny lightning flashes, belongs to a "sensitive" person with a certain artistic temperament; the second (confused) form is characteristic of an "extremely nervous" person; while the third, with its smooth regularity, denotes a person of "normal temperament."

Along with the pictures go other statements, which, if true, would prove that the "human aura" is a phenomenon of enormous importance in our lives. I select two or three of these statements for comment. First, take this one: "The human aura is a reflection of the human body, which is an electrical emanation from the body, which takes the form of a cloud, the character of the individual, and which can be formed, either by the action of a special photographic apparatus, or by the action of a special photographic apparatus."

Here is another specimen: "It is contended by scientists, as an illustration of what the aura really is, that Joseph's coat of many colors was none other than his aura, resplendent in spiritual glory, to those who read the Scriptures mystically. In the photographs and drawings here taken the aura is shown in many forms and colors."

AS A THICK HAZE.

For instance, the aura of immoral people is depicted as a thick haze, shapeless and ill-defined, but in educated or artistic persons the aura assumes certain fairly definite shapes. Indeed, as a revelation of character, aura reading is supposed to be unexcelled, and made with a particular reference to this science any it is a ruthless searchlight, which is shed or of secret selves may hope to escape."

Now I should be immensely impressed by all of these statements if they were not so obviously untrue. If scientifically acceptable, proof of them were forthcoming. They are, however, mere statements of opinion, and are not at all of scientific value. They are, however, mere statements of opinion, and are not at all of scientific value.

of the public which has a great respect for the name of science, but no expert, or profound, knowledge of either its methods or its facts. Who are these "scientists" who compare Joseph's many-colored coat to an aura or affirm that each organ of the body has its own particular "emanation," which can be utilized in locating and diagnosing disease?

If you want a doctor of good standing in his profession, ask him about it. Who will show me a genuine photograph of an "aura," and one, too, showing its "colors"? Who invented the "special photographic apparatus" which is capable of taking these remarkable pictures? If anybody possesses one, will he submit its performance to a rigid scientific test?

The world and the universe are still full of mystery. What science knows is a mere nothing in comparison with that of which it is ignorant. The human brain and the human body contain innumerable secrets which will not be lifted. I would not put a pin in the path of any person who undertakes to investigate the nature and the cause of any strange or unexplained phenomena. It may be for all I know, the cause of the human mind, and the cause of the human body, is a mystery. It is a product of the human mind, and the human body, is a mystery. It is a product of the human mind, and the human body, is a mystery.

What is not forth in the quotations above is simply material for the work to work upon. It is a product of the human mind, and the human body, is a mystery. It is a product of the human mind, and the human body, is a mystery. It is a product of the human mind, and the human body, is a mystery.

Here is another specimen: "It is contended by scientists, as an illustration of what the aura really is, that Joseph's coat of many colors was none other than his aura, resplendent in spiritual glory, to those who read the Scriptures mystically. In the photographs and drawings here taken the aura is shown in many forms and colors."

AS A THICK HAZE.

For instance, the aura of immoral people is depicted as a thick haze, shapeless and ill-defined, but in educated or artistic persons the aura assumes certain fairly definite shapes. Indeed, as a revelation of character, aura reading is supposed to be unexcelled, and made with a particular reference to this science any it is a ruthless searchlight, which is shed or of secret selves may hope to escape."

GRAUSTEIN 'S BANKRUPT; HAD \$1,000,000'

Charles E. Pierce, counsel for the Boston & Maine Railroad, said, while cross-examining William A. Graustein at the milk hearing in the Federal Building today, that Graustein was lying.

A wrangle between Graustein and Pierce then led to Examiner Brown, who is holding the hearing for the Interstate Commerce Commission, ordering the "witness" out of the room.

The hearing is on the complaint of discrimination brought by Ida S. Graustein, wife of William A. Graustein, against the Maine Central and the Rutland Railroad regarding rates for and transportation of Graustein milk.

Mr. Graustein asked an assistant for his wife and himself. Mr. Pierce for the Boston & Maine and W. W. Lawrence for the Rutland represent the railroad interests.

"BANKRUPT NOW." Early in his cross-examination of Graustein, Pierce tried to get into the records matter regarding any convictions of Graustein & Company or the Farmers' Milk Company, conducted by Graustein. Graustein objected to admission of the questions, and Examiner Brown ruled them out.

Graustein, on further questioning, said: "I was worth nearly \$1,000,000 ten years ago, but today, as a result of discrimination on the part of various railroads, I am bankrupt. The Boston Condensed Milk Company was killed by unfair competition."

"I had the best store trade in Greater Boston, but hostilities against me began in 1906, and continued up to the failure of the company, when the hostilities ceased. But they have begun again. The Health Department, Chamber of Commerce, the railroads, Whiting, Hoovey and Turner Cattle Company have all been working against me."

Mr. Pierce asked: "Did you consider that the Boston Condensed Milk Company was killed as you shoot a man on the street by the Sanitary Company of New York?"

"I don't," replied Graustein. "Well," declared Pierce, "I want to say here that this man is lying. On previous occasions you have stated that the Sanitary Company was responsible for a whole lot of trouble of the Boston Condensed Milk Company."

"WELL, COME BACK." After Examiner Brown ordered this witness out of the records Graustein said: "I will come back yet from nothing to what I was before, supplying at least one-fourth of Greater Boston with milk. I lost my business of supplying milk at the South Boston restaurant. They told me they could not continue to take milk from me, but that they would not send back. I have found some honorable men, even on the railroads."

**LIFT BAN ON MEAT
ST. PATRICK'S DAY**

In accordance with a special dispensation issued by Pope Benedict XV, the law of abstinence of the meat of Fridays governing the use of meat on Fridays will be dispensed with Friday, the feast of St. Patrick. The official notification is:

"Pope Benedict XV, knowing that the feast of St. Patrick is particularly dear to the hearts of Catholics of Irish descent, and that the day is observed by a celebration in honor of the great apostle of Ireland, has this year dispensed from the law of abstinence, on St. Patrick's day, Friday, March 17, all Catholics of Irish American descent or societies in the archdiocese of Boston."

**THREE WIVES ARE
GRANTED DIVORCES**

Three wives were released from the bonds of matrimony in the Superior Court today. Mrs. Alice M. McKay of Melrose said her husband, Stephen, struck her and threatened to shoot her and to cut her throat. Mrs. Mary L. Rowland of East Boston said her husband, Timothy, hit her with a beer bottle and threw cups and saucers at her. Mrs. Ellen M. Johnson testified her husband, Axel, led her to "go where he could have more room."

**FIREMEN REMOVE
MAN HURT ON ROOF**

Firemen from Ladder Company 23 at Dorchester were called today by the police to remove Thomas Trainor of No. 11 Davis street, South End, a carpenter, who had been injured on the roof of the Municipal building in Codman square. Trainor was on a ladder set on a small roof on the building when he fell twelve feet to the roof below. He was taken to the City Hospital with a fractured left ankle and bruise.

**BRITISH CRUISER
OFF CAPE HENRY**

Captain H. S. Chase of the Merchant and Miners line Howard, which arrived at the New Haven docks today from Norfolk, reported sighting and naming a three funneled British cruiser, with lookouts posted at all quarters. Fourteen miles off Cape Henry, Va., last Thursday.

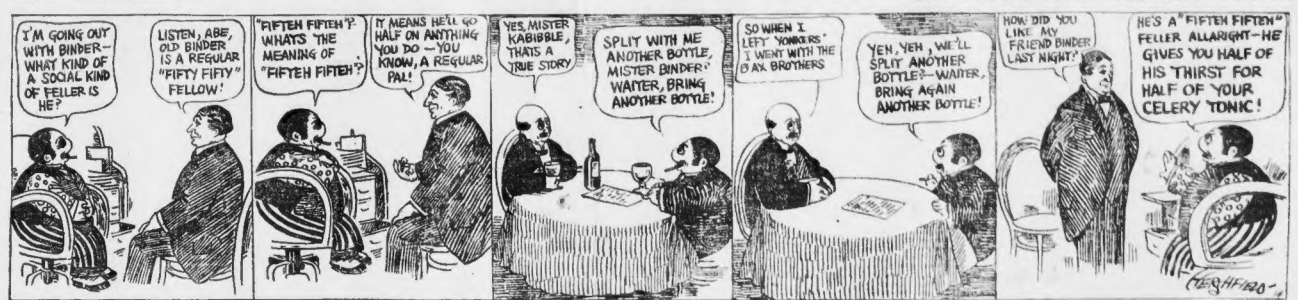

**HOLD QUINCY MAN
AS WIFE SLAYER**

Frank Colletti of Quincy was held without bail for the Grand Jury in the Quincy Court today, charged with the murder of his wife, Josephine, on January 26. Colletti was found unconscious beside his wife's body in his home on Hayden street, by the police. He had shot himself. Today he was able to leave the hospital.

Real Intervention Would Save Bloodshed

WE think it is a mistake to begin an invasion of Mexico with a few thousand men.

We hope our fears are false prophets. But we cannot help fearing that an invasion in small force will encourage a by no means contemptible rising and resistance of a population which would not rise if we sent a hundred thousand men at once to seize the railways, sea ports and strategic capital cities of Mexico and so impressed that population with a visible lesson in the hopelessness of resistance.

The people of Mexico are Indians—just plain Indians. There is less than ten per cent. of Spanish blood in the whole population. These Mexican Indians are incredibly ignorant of the true power of the United States. Unhappily, our policies for a long time has encouraged in these ignorant people the conviction that we are afraid of them—even the absurd conviction that they can whip our armies.

Unless we march into Mexico in such strength as to undeceive these ignorant people at the very outset they will rally to their chiefs, and we shall have a war that will cost many thousands of lives and many hundreds of millions of dollars.

We do not pretend to any more than the most rudimentary knowledge of military strategy. But we do recollect history, and we do know Mexico and the ways of thought and action peculiar to Mexico's population.

The inhabitants of Mexico being in such overwhelming majority pure-blooded Indians or halfbreeds, they think in terms of Indian thought. They reason in terms of Indian logic. They learn and believe only as all childish intellects learn and believe—by seeing and hearing. The abstract is incomprehensible to them.

They will estimate the power and military strength of the United States only and alone by the visible numbers of our invading troops. And if they see only a handful cross the border they will inevitably reason that no more soldiers have been sent because we have no more to send. And if no more than a punitive expedition to catch Villa is dispatched across the border the peons will rally to Villa or to some other leader by thousands, and we shall have a hard and costly guerrilla war on our hands.

We wish the administration knew more facts and had fewer idealistic theories about Mexico and Mexicans.

We wish the President would listen to the counsel of Western men who do know Mexico and Mexicans at first hand.

We wish that the President and Congress could realize that it is waste time to deal weakly with the ignorant masses of Mexico; that the only thing which will impress them and awe them and save much bloodshed and much cost is a sudden display of overwhelming force.

We think that the President will find that every officer in the United States army and every Senator and Representative who knows Mexico familiarly will tell him that what has here been said is very true.

The Simple Virtues Best Become the College Man

LAST week the figures concerning the cost of educating the Yale senior class were published. They are a little surprising. The average cost per man was \$4,073.

There were other items of interest made public concerning the senior class. Almost one-half of the class who drink took their first drink at Yale. Almost one-half of the class who use tobacco contracted the habit at Yale.

Yale used to be the college of Spartan simplicity. In those days, only ten years ago, Yale, then one-half the size of Harvard, nearly always defeated Harvard in the major athletics. A victory for Yale over Harvard on the football field and on the water was so commonplace that it scarcely gave Yale men a thrill.

All that is changed now. A few years ago the social influence of a certain very wealthy young man from New York made him captain of the crew, and Yale lost the race that year for the first time in years. It was the beginning of the end of Yale's glory in athletics on all fields. Until quite recently Harvard had been in the habit of putting hobnob plants, whose fathers had money, on her athletic teams, and the result was always disaster. This practice has been wisely changed, and the change has produced a series of victories quite unprecedented in the history of Harvard.

Dilettantism, favoritism, luxury, are as destructive of the athletic capacity of a college as they are destructive of the warlike capacity of a nation. Simplicity on the virtues which attend it are as important as training and equipment both in athletics and in war.

TO THE RESCUE!

More Truth Than Poetry

By James J. Montague

The Kansas Cyclone

THEY never have to ask him if he needs a bigger force. They don't nag him for estimates of men and guns and horses; they don't inquire if he would like to have some one explain the methods planned in Washington for making a campaign. But when the dog's snuffed, and there's any one to "go," they merely say: "Go on the job!" and Funston says, "You bet!"

He doesn't ask for seasoned troops; he takes 'em as they come. He knows that they'll keep up with him; and that is going some.

Over Their Shoulders

The Villistas are watching, but not waiting.

A Real One This Time

The next army training camp apparently will be established in the Republic of Mexico.

A Man Who Knows

If Villa had taken the trouble to consult with Aguinaldo he might have modified his program.

Which Is Approximately the Mexican Border

Victor Mordukhai says the United States hasn't a friend in any foreign government. And pitifully few in its own, we may add, without fear of embarrassing contradiction.

Lonesome

Victor Mordukhai says the United States hasn't a friend in any foreign government. And pitifully few in its own, we may add, without fear of embarrassing contradiction.

He doesn't need the books that treat of fighting as an art. He doesn't bone on tactics much; he knows 'em all by heart. But when they warn him solemnly that there will be a fight and not an easy one at that, he grins and says, "All right."

He wouldn't make an ornament that any one would mark. Carved out of bronze and mounted on a statue in the park. He isn't any Washington in person or in size. He wouldn't be a hero in a maiden girl's eyes. But we've not had a fighting man for many a long, long day like General Frederick Funston of the U. S. A.!

Couldn't See It

A national boundary is an imaginary line, and Colonel Shuman and his men have very little imagination.

Real Retribution

Some of these raiding Mexicans may never know who won the Willard-Moran fight.

Always Eminently Proper

The last thing to expect of Charles E. Hughes is defiance of any convention.

Clearing Up a Mystery

The Postoffice ruling that manure is a waste is a good thing. It explains why so little good light fiction is to be had nowadays.

Mothers Should Impress Their Sons While Young With High Ideals

Boys Should Be Brought Up to Regard All Young
Girls in the Way They Would Like to Have Their
Sisters Regarded

By Ella Wheeler Wilcox

A WOMAN who has been the mother of eleven children and who is now a widow and obliged to be self-supporting, writes interestingly on the subject of Motherhood. She says: "In my business life I come in contact with some very bad mothers; had in the sense that they do not consider it important to bring up a boy with moral ideas as well as a daughter. Most of them think that it is necessary for a boy to sow his oats. "The son of one such mother brought sorrow to another mother's daughter. I am endeavoring to impress upon my boy, who is sixteen, that he is to regard all young girls in the same way he would like his sister to be regarded."

My correspondent proceeds to comment upon the prevailing habit of song writers who ridicule the word "wife." The word wife, she says, is used in song only to bring a laugh. The "Hokey, Hokey, My Wife Has Gone to the Country" style of song, she feels, is a reflection upon all good women and lowers the ideals of young men regarding marriage.

Some one has said, "Let me write the songs of a country and I care not who makes the laws." One cannot help but wonder why the woman who is a wife, and who calls forth only ridicule from the song writer and the humorous poet, becomes suddenly so sacred a being when she brings a child into the world.

The wife whose husband rejoices when she leaves home, in order that he may enjoy himself with the boys, is not liable to be an ideal creature as a mother. Either the woman has driven a good man into wrong paths, in which case she ought not to produce her own kind, or else the husband is a worthless sort with no sense of obligation regarding his marriage vows, in which case his qualities ought not to be perpetuated. It is not infrequent for men who have sowed a full crop of wild oats to have a daughter who indicates a propensity to admire the opposite sex. Yet like father, like daughter, is the rule of heredity. All over the land there are Mothers' Clubs and they are excellent organizations. They help mothers to think, act and work toward higher standards of motherhood. Why would it not be a good idea to start a club of "Wifehood"? To this club, of course, only married women could belong. Everything which would conduce to higher ideals of wifehood and to the making of successful homes should be discussed in this club. Each member should, at some time during the year, read a paper, or give a talk on what she considered the highest ideals and most commendable qualities of good wifehood. Then the other members of the club should discuss this view.

The undesirable qualities of women which render wifehood a failure should come up for discussion. Many a wife who is wondering why her marriage is not a success might be shown the reason through a discussion of this kind.

His Wife's Folks

By William F. Kirk

SHE was pretty and dimpled and charming; She called her dear husband her prince;

He wed her the year he went farming And hasn't regretted it since.

Her eyes were as blue as the luster Of a blueberry ripe on the hill.

Her curls were a wheat-colored cluster; Her voice was like murmuring rills.

But her folks— They were jokes— To behold!

In the album that lay on the table Was her father's best tintype—a face Like Cain's on the day he killed Abel Or Lucifer falling from grace.

There was dear old Aunt Ella of Austin, Who never had married a gent,

And rich Uncle Jaber of Brent, Who died while collecting his rent.

Yes, her folks— They were jokes— To behold!

They were jokes— One and all.

There was one little print of her brother In the latest and swiftest of frames;

His collar was making him smother, His glare like the late Jesse James.

There were sisters who grinned from the pages And conspired with faces like pies;

Relations of various ages, All homely and hard on the eyes.

Yes, her folks— They were jokes— To behold!

Short and tall, Looked like sin, One and all.

In-Shoots

Good fortune always shines on the fellow who has the ability to grab everything in sight.

The successful preacher, of course, is the one who can produce the most anxiety.

We can always think of suitable punishment for the sins of the other fellow.

The man who has satisfied himself usually has trouble in pleasing his bored neighbors.

A dog can take a bath every day and still be a cur, and it is that way with some men.

The handshake that seems like warm friendship is often but the preliminary of a "touch."

Lovers in a cottage should not be confounded with existence in a shack during courtship days.

The boy who seems wiser than his peers never exhibits a disposition to get out and hustle for himself.

When we look at the owners of some dogs we wonder how the animals can be so intelligent.

The olive branches that many persons pretend to extend look more like fly swatters.

The wife of a bespectacled man usually wears the look of a martyr who's away from home.

You are not apt to catch many fish if you allow the other fellow to bait your hook.
